CONCEPT

2015 SPONSORS

ESG is the UK's leading provider of testing, inspection and compliance services, with comprehensive solutions in Infrastructure, the Built Environment and Energy. Our unrivalled range of technical expertise is underpinned by a nationwide network of UKAS accredited laboratories, consultancy support and field based operations.

www.esg.co.uk

Southern Testing Laboratories are Independent Geotechnical and Geo-environmental Site Investigation Consultants based in Sussex with a regional office in the Midlands. We own and operate a wide range of conventional, low-disturbance and restricted access drilling and field equipment, and our geotechnical laboratory offers comprehensive soils, materials and aggregates testing.

www.southerntesting.co.uk

ALS Environmental is a world-class analytical testing company supplying a wide range of expert services to the remediation and investigation markets. As an organisation ALS can provide you with UKAS and MCERTS accredited laboratory testing, in-field, real-time analysis and OnSite monitoring including sampling and Environmental Field Chemists.

www.alsenvironmental.co.uk

CGL is a leading edge geotechnical and geoenvironmental consultancy working at the forefront of the construction industry throughout the UK. We provide value engineered ground solutions that meet and exceed the expectations of our clients.

www.cgl-uk.com

Envirolab is a dynamic analytical laboratory with an outstanding track record for delivering analysis on time and competitively. A UKAS accredited laboratory, Envirolab provide specialist analytical services for a variety of organic and inorganic analytes in a diverse range of matrices including contaminated land soil and water samples.

www.envlab.co.uk

Geotechnical Engineering Ltd is the largest independent ground investigation contractor of its kind in the UK. We are a progressive and energetic company with a renowned and enviable reputation for innovation. With a client base ranging from private individuals to main contractors to large multidisciplinary Consultants, we work to deliver a quality, unrivalled service to our Clients.

www.geoeng.co.uk

In Situ Site Investigation is a specialist geotechnical and geo-environmental site investigation company, which specialises in the use of Cone Penetration Testing (CPT) techniques and other related pushing technologies. We operate predominantly in the UK but also carryout international projects in Ireland, the Middle East, Southern Africa and Eastern Europe.

www.insitusi.com

Keynetix are experts in Geotechnical and Geoenvironmental Data Management. Our solutions cover every stage of the Geotechnical data journey from planning, through site work and reporting to 3D Modelling, BIM and National Archives. As site investigation experts, Keynetix can advise on the best solutions to meet your needs and requirements.

www.keynetix.com

Soil Engineering Geoservices is an award winning company and one of the largest providers of geotechnical site investigation, drilling & grouting and geotechnical laboratory services in the UK. The business operates nationally offering both land and marine services from three offices at Leeds, Cleland in Scotland and Camberley, Surrey.

www.soil-engineering.co.uk

Concept specialises in the geotechnical, geoenvironmental and structural site investigation sector. We were formed some 18 years ago. Since formation we have grown to occupy a prominent role in our sector. In 2014 Concept were awarded both the prestigious Ground Engineering Award for the Best Ground Investigation Specialist in the UK and also the ICE London Civil Engineering Award for Greatest Contribution in recognition of the quality of the service we provide.

www.conceptconsultants.co.uk

Structural Soils Ltd is a national site investigation contractor with over 50 years of experience. We are based in Bristol, with branch offices in Castleford near Leeds, Hemel Hempstead and Glasgow. The company operates various types of drilling rigs and associated equipment, and can design ground investigations to suit client requirements.
