Overall, how would you rate this webinar?

Lab /Sampling Practice

3 speakers covering

- Air
- Environmental
- Geotechnical

Key Topics

Asbestos - Working with Contam land group, EIC groups, Brownfield Forum and others on clarifying requirements for labs under new guidance from HSE in HSG248

PFAS – Article for the June/July Magazine

Geotechnical Sample volume – Documents prepared and pending the final version of the Yellow Book

Ongoing work on calibrations of filter papers

Engaging with geotechnical suppliers

Future Plans

Driving new members for group and AGS

Method standardisation on Coal Tar Analysis

NVQ for field technicians

Engaging with the other AGS working groups – attendance at other meetings and inviting people to our meetings to promote diversity of opinion

Thank You
